# **FLOOD CONTINGENCY & RESPONSE PLAN\_2023**

## **Introduction**

The District Goalpara is a flood prone district. This response plan aims to deliver emergency services during flood, but the plan is also applicable in other disasters. The climate in the district is moderate during the winter and in summers it is hot. Generally, rain makes its first appearance in the month of April with occasional and irregular light showers and at times heavy downpour followed by the cyclonic storm. The irregular rainfall continues up to the end of May. The rain occurs due to the influence of North-Eastern wind. Monsoon rain normally begins from early part of June and heavy or very heavy rains occur in the district till the month of October. The maximum temperature is 33<sup>o</sup> C during July and August and the minimum temperature dips down to 7<sup>o</sup>C in the month of January. About 80 % rainfall is from South West monsoon.

Goalpara district experiences floods of moderate to severe intensity during the monsoons. Besides this, the flash flood witnessed by the district during October, 2004 and September, 2014 added a new dimension to the degree of devastation that may cause due to any flood. The pattern of flood cannot truly be forecasted in spite of the well-organized warning systems. It is therefore, imperative that in order to ensure speedy and efficient rescue, relief and rehabilitation, a well-prepared master plan is formulated.

## **Brief cause of September Flash Flood 2014.**

It was seen that very heavy rainfall occurred from 19<sup>th</sup> September/2014 to 22<sup>nd</sup>-September/2014. This incessant rainfall occurred due to heavy rainfall in the Garo hills area of Meghalaya. Due to this incessant rainfall Rangjuli, Dudhnoi, Krishnai, Mornoi, Damas and its adjoining area were over flooded along with abnormal rise in water level of river Dudhnoi and Krishnai. The rainfall on 22-09-2014 was unpredictably high which 368.60mm. The marginal bund at Mornoi for a length of 120m on the L/B of river Krishnai and the Panchayat bunds at three places of Sarapara area for a length of 50m, 55m and 70m on the R/B of river Dudhnoi were breached on 22-09-2014 due to overtopping. Moreover, the Panchayat bund at Upartola area on the L/B of river Dudhnoi and the road cum marginal bund at Damas area on the R/B of river Krishnai were also breached for a length of 195m and 55m respectively on 22-09-2014. Several villages namely Shingimari, Gopalpur, Mornoi, Monakosha, Nayapara, Sarapara, Karipara, Upartola, Bejnapara, Dohapara and agricultural fields adjacent to these breach portions were severely affected by the flash flood. Due to breach of the embankment of Krishnai river, water enters to Jinjiram river and causes heavy flood in nearby villages of Jinjiram. Moreover, there was breach of railway track and it caused intense current.

### **GENERAL BEHAVIOUR OF RIVERS / DRAINAGE INTO RIVER BRAHMAPUTRA**

The main tributaries, those fall into the river Brahmaputra under jurisdiction of Goalpara Water Resource Division are river Dudhnoi, Krishnai and Jinari. All the three rivers originate from Garo Hills in Meghalaya and flow in meandering courses. The rivers flow in a steep gradient for which they are flushy in nature. They also carry huge amount of silt load during the flood season every year and they are getting deposited in the plains of Assam. The river beds are gradually rising because of the fact for which bank erosion at different locations are going on.

### **ASSESSMENT OF REQUIREMENT FOR RESCUE & RELIEF**

The whole district has been divided into 5 Zones and again Sub divided into 08 Sub-Zones. Each Sub-Zone has been divided into Flood Related Sectors and Non-Flood Related sectors. A Revenue Circle has been taken as a whole zone. The zones will be headed by the respective Circle Officers and the Sectors by the Sector Officers. Each Sub-zone will be headed by the respective Block Development Officer.

## **1. Background and Rationale**

The Assam State Disaster Management Manual (ASDMM), 2015 which is cabinet approved framework for relief and response based on the National Disaster Management Act, 2005 brought in a paradigm shift in planning for emergency preparedness and response and broader disaster management in the state.

The manual through relief camp management guidelines sets aside certain minimum standards to be adhered to by responsible stakeholders for providing immediate services and protection to the victims who have been rendered homeless/displaced. It is essential that the compliance to the guidelines is measured with due seriousness so as to improve upon quality of disaster response services and for bringing greater accountability among stakeholders.

This document is based on field level assessment considering the provision of 'Relief Camp Management Guideline' (Appendix-XXXV) of the Assam Disaster Management Manual, 2015. It aims to assess the basic quality services provided in relief camps, to measure the compliance standard and to understand areas of improvement for effective and transparent relief camp management as mandated in the cabinet approved manual.

Some of the key recommendations made during a pilot assessment and scoring of relief camps were though forwarded to DDMA's for consideration in Relief Camp Management during flood 2019. However, there is a need for sensitizing the stakeholders on relief camp management guidelines with the following objectives:

- To assess the basic quality services provided in relief camps and to measure the compliance standard as mandated in 'Relief Camp Management Guideline'
- To sensitize the officials /staff of the line departments and other stakeholders on the coordination of response and areas of improvement for effective and transparent relief camp management.
- To develop a system for accessing and improving the management of relief camps.

## **2. Purpose of the SoP**

This Standard Operating Procedures (SOP) document has been developed to supplement the 'Appendix XXXV - Guideline for Relief Camp Management' of the Assam Disaster Management Manual 2015. This SOP aims at making the role and responsibilities more specific for the key personnel involved in the management of relief camps during emergencies/disasters.

## **3. Role and Responsibilities**

Following are the roles and responsibilities of the key personnel attached to the relief camp management both at district level as well as at the revenue circle level.

## Managing flood relief camps in context of COVID -19 outbreak in Assam

(Notified vide No. RGR/ASDMA.09/2014/323 dated 24<sup>th</sup> April, 2020)

Assam is approaching flood season. This year the challenge to support those who might get affected due to flood will be even tougher due to the ongoing COVID-19 pandemic across the globe which has also affected Assam. Relief Camp Management Guidelines are included as Appendix-XXXV of the Assam Disaster Management Manual, 2015<sup>2</sup>. In order to be better equipped to deal with flood situation vis-à-vis COVID-19 context, this document has been developed to serve as an addendum. This document will be used by all District Disaster Management Authority (DDMAs), SDO (Civil) and Revenue Circle Officers for management of Relief camps during ensuing flood season.

Major highlights of the addendum to existing Relief Camp Management Guideline are as follows:

- **Relief Camps and Accommodation capacity to be earmarked in advance:** Identify additional relief camps in addition to the existing pre-identify camps as per population density of villages to earmark space for social distancing. Ensure 7 Sq. m. of area per person instead of 3.5 Sq. m. to validate social distancing of at least one meter between any two camp inmates (calculation of intake Capacity of Relief Camps are given in the table next page).
- **Toilets facilities and the populations:** Sufficient Toilet facilities have to be provided in proportionate to the intake camp capacity. Coordinate with PHE Deptt. to ensure the same.
- **Ensure sufficient sanitation facility:** Ensure sufficient Hand-wash/soap, sanitizers, masks for the camp inmates. The Relief camp premises should be strictly notified as no-spitting, no-tobacco zone.
- **Medical Support & Health Surveillance Team:** Daily monitoring (in place of weekly) of health condition shall be done by the health team on duty in the camp following all precautions and guidelines. Medical team should be armored with basic PPE for conducting screening during registration process. Pre-identification of the Medical facilities like Ambulances for transportation of infected, isolation facilities nearby etc. In case of sneezing, cough, fever & common cold, immediate medical supervision to be made and he/she may be kept separately as per COVID-19 norms & regulations.
- **e-Help desk:** e-Help desk should be facilitated in all Operational Relief camps with the help of *Pratirodhi Bondhu* as counselor/ facilitator. These desks will emphasis on the facilities available on the e-help platform (e.g. Telemedicine, e-pashu etc.), a joint venture of ASDMA and CSC-SPV.
- **Pratirodhi Bondhu:** The Revenue Circle Administration may engage Pratirodhi Bondhu volunteers available in the revenue circle as per the guidelines.
- **SOP for relief/cooked food distribution in camps:** SoP should be prepared in collaboration with ASDMA for distribution of relief items/cooked food adhering precautionary measure as per COVID-19 norms & regulations.
- **Arrangement for fodder Livestock:** Pre-identify the highland areas e.g. tea gardens etc. with green grasses for arrangement of the green fodder for livestock of the farmers/ camp inmates.
- **Quarantine/isolation facility:** Quarantine/isolation facilities may be identified on higher altitudes by the district administration for transfer of COVID-19 suspected cases.

The detailed addenda to existing relief camp management guideline are comprehensively cited in the table below for managing flood relief camp vis-à-vis COVID-19:

## Child Friendly Spaces in Relief Camps

*(Guidelines for operationalization in the context of COVID-19)*

CFS is a place designed and operated in a participatory manner where children affected by disasters can be provided with a safe environment, integrated services including play, recreation, education, health, and psychosocial support and/or information about services/supports provided. The purpose of CFSs is to support the resilience and well-being of children through, structured activities conducted by community in a safe, child friendly, and stimulating environment.

District Administration will set up "Child Friendly Spaces (CFS)" in every Relief camp in co-ordination with Line departments and NGOs / civil society organizations. All protocols for COVID-19 containment including safety and security of children will be ensured in CFS

Child Friendly Spaces are a critical and non-negotiable component of relief camp management in Assam.
